

Product Datasheet

Item No.: 63256

PRODUCT NAME

5 channel, curved 30° for solid rubber cable bridge 5 channel 40x40 mm

Reference image

- Used to protect cables, hoses and pipes on the construction site.
- Cable bridges make it easier to cross the laid cables and help to prevent tripping accidents on the construction site
- Made from non-conductive and robust solid rubber in black/yellow signal color
- Extremely non-slip surface thanks to the solid rubber material and the surface structure
- The material is UV-resistant and high-heat resistant, as well as resistant to acid and alkalis
- Very stable support on the surface thanks to the high tare weight of the cable bridges
- Suitable for being driven on by heavy-duty traffic of up to 10 t or 20 t axle load, max. drive-over speed 10 km/h
- Simple connection system allows for unlimited extension of the cable bridges

Technical data

EAN	4011160632563
Weight [kg]	3.2
Dimensions	30x5x50 cm
Main color	black
Category	CEE 400 V product range
Subcategory	Cable bridges
